

MyTrickRC Light Strips

NOTE: Light strips are designed to be powered directly off your vehivle's radio.

It is not recommended to connect more than three 12" light strips to your receiver. If you want more lights, then we recomend powering directly from your battery using **MyTrickRC's Battery Adapter** visit mytrickrc.com for details.

If LED strip doesn't adhere to desired surface apply a small amount of Zap Goo or Shoe Goo

INSERT LIGHT STRIP INTO ANY AVAILIABLE CHANNEL ON YOUR RADIO
